PROFESSIONAL SUMMARY

Engineering student at SASTRA building LLM and Agentic AI systems — multimodal video intelligence, agent orchestration with LangGraph, and full-stack web applications.

EDUCATION

B.Tech in Computer Science (AI & Data Science)	Expected 2027
SASTRA Deemed University, Thanjavur, Tamil Nadu	
Higher Secondary Education	2022
Kendriya Vidyalaya No. 1, Akhnoor, Jammu & Kashmir	
Secondary Education	2020
Kendriya Vidyalaya Hirapatti, Azamgarh, Uttar Pradesh	

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript

AI & ML: LLMs, Agentic AI, LangGraph, Machine Learning, Deep Learning, Transformers, OpenCV

Web & Tools: React, Node.js, MERN stack, Redis, Git, Claude Code, HTML/CSS

PROJECTS

A.R.G.U.S-V — Video intelligence framework for YouTube

- Streaming ingestion unlocks natural-language querying ~13-20s after a video starts processing, instead of minutes
- LangGraph agent with dual-LLM routing; replacing an LLM critique loop with rule-based evaluation cut ~28s per query
- 8-GPU pipeline on DGX H200: FastAPI ASR + vision microservices, Redis task queue, LanceDB vector store

Technologies: Python, LangGraph, vLLM, Whisper/Canary ASR, Qwen3-VL, LanceDB, Redis, FastAPI

Voice of Monetary Policy — Multimodal analysis of FOMC meetings

- Three-modality fusion: computer vision, audio processing, and NLP
- Feature-extraction pipelines feeding trained ML classifiers
- Robust stance classification across meetings

Technologies: Python, OpenCV, LibROSA, Transformers, scikit-learn

OpenWell — Digital mental-health platform

- Supabase auth, database, realtime, and edge functions behind a React + TypeScript front end

- Anonymous-mode design so users can seek help without an account
- Four-language i18n including Kashmiri and Dogri

Technologies: TypeScript, React, Vite, Tailwind, shadcn/ui, Supabase

Live: openwell.vercel.app

CERTIFICATIONS

- DSA to Web Development — GeeksForGeeks
- Cloud Computing — Coursera
